

Summary

Accomplished Software Developer with over 10 years of experience in front-end and back-end development, demonstrating expertise in creating robust and scalable applications. Proficient in utilizing cutting-edge technologies such as Sass and TypeScript for front-end development and PHP, Node.js, and C# .NET for back-end development. Known for delivering high-quality solutions, collaborating effectively with cross-functional teams, and maintaining a strong focus on user experience and system performance. Adept at problem-solving, with a proven ability to adapt to new challenges and integrate innovative solutions. Experienced in managing projects with intermittent career gaps, showcasing resilience and commitment to continuous learning and professional growth.

Work History

Applications Developer

Energy Management Systems 04/2023 - 08/2024

Summary: Led the development and maintenance of enterprise-level energy management applications, focusing on real-time data processing and visualization. Spearheaded the migration from legacy systems to modern, scalable architecture using C# .NET Core and TypeScript.

- Architected and implemented real-time data processing systems
- Reduced system response time by 40% through optimization of database queries and implementation of caching strategies
- Implemented automated testing and best practices
- Designed and deployed RESTful APIs serving multiple client applications
- Implemented CI/CD pipelines reducing deployment time

Various

Various Roles 11/2019 - 04/2023

Summary: During the economic downturn, maintained employment through various temporary positions while actively developing personal software projects and expanding technical skills. Leveraged this period to explore new technologies and maintain professional development despite market challenges.

Sr Systems Developer

PPR Note Co, LLC 06/2015 - 11/2019

Summary: Led development efforts for financial note processing systems, managing both technical implementation and team coordination. Responsible for architectural decisions and implementation of best practices.

- Designed and implemented a new customer portal reducing support tickets
- Created automated reporting systems saving 20 hours of manual work weekly
- Integrated multiple third-party APIs for real-time data collection and analysis
- Modernized frontend architecture using TypeScript and Sass, improving development efficiency
- Implemented CI/CD pipelines reducing deployment time

Jr Software Developer

PPR Note Co, LLC 06/2013 - 06/2015

Summary: Contributed to the development and maintenance of financial processing systems, focusing on front-end development and database optimization.

- Redesigned company's primary web application using modern JavaScript frameworks
- Implemented responsive design patterns reducing mobile-related support tickets
- Created reusable UI component library improving development efficiency
- Developed interactive data visualization dashboards for financial metrics
- Integrated front-end error tracking reducing time to identify client-side issues

Data Entry Manager

PPR Note Co, LLC 01/2012 - 06/2013

Summary: Managed data entry operations and led process improvement initiatives. Supervised a team of data entry specialists while implementing quality control measures.

- Led a team of 8 data entry specialists
- Implemented quality control processes reducing error rates
- Developed Excel automation tools improving productivity
- Streamlined workflow processes reducing processing time

Data Entry Specialist

PPR Note Co, LLC 09/2011 - 01/2012

Summary: Performed accurate data entry of financial documents while maintaining high attention to detail and meeting strict deadlines.

- Consistently exceeded accuracy targets
- Developed efficient data entry procedures
- Trained new team members on systems and procedures
- Contributed to process improvement initiatives

Diverse Youth Employment in Retail and Trades

Various 06/2005 - 09/2011

Summary: During my early years, I accumulated a wealth of experience across a variety of roles in both retail and trades. These jobs honed my customer service skills, instilled a strong work ethic, and provided invaluable practical knowledge.

Technical Skills

- **Languages:** C#, TypeScript, JavaScript, PHP, SQL
- **Frontend:** HTML, CSS, Sass, React, Angular
- **Backend:** .NET Core, Node.js, REST APIs
- **Databases:** MS SQL Server, PostgreSQL, MySQL, MongoDB
- **Tools:** Git, Docker, Azure DevOps, GitLab
- **Methodologies:** Agile, Scrum, TDD, CI/CD
